COMMENTS

Salsa, the real thing, is just that. There is nothing fancy about it, just good ole salsa as it ought to be. Make it often, make it hot, and share it with your friends. You'll soon find that you have more friends than you thought.

There are no preservatives in home made salsa. Refrigerate after you make it, and when you're not serving it. Make only as much as you will use in a day or two. If you like spicier salsa, add more peppers. The blend of jalapeno, anaheim, and banana peppers gives a full flavor and the heat sort of sneaks up on you while you are enjoying the salsa. The roma tomatoes make for a meatier salsa. Feel free to substitute other types of peppers and tomatoes based on preference and availability.

Enjoy!
